

Water Saving Measures

Karels relies on rainwater and a limited amount of bore water for its water supply

Save water by doing the following:

- 1. Take short showers of less than 3 minutes**
- 2. Do all dishwashing using the dishwashers. Scrape plates but do not rinse.**
The dishwashers use only 12 litres per wash
- 3. The washing machine is for managers' use only.** Maximum of one wash per day
- 4. Do not leave taps running.**
